Annual Report 2026

Revenue grew 12% over the previous quarter, led by enterprise subscriptions and a stronger renewal rate across all regions. The pipeline entering the next quarter is the largest on record.

Operating costs held steady while the team expanded, and the margin improved by two points compared with the same period last year. Headcount growth was concentrated in engineering and support.

The board approved an additional allocation for infrastructure, which is expected to reduce unit costs materially by year end.
